

# 1<sup>st</sup> CONFERENCE

## The Future of Electrical Installations

powered by **BOUSSIAS**  
events

### Quality - Safety - Innovation Technology

The 1st conference of the Hellenic Institute of Electrical Technology (HIET) will be a forum for the comprehensive exchange of ideas, regarding the value of certification and safety of electrical installations. The Conference will host renowned Greek and European speakers from Enterprises, the Government, and Institutional oversight Agencies.

The Conference will focus on the future of businesses that utilize cutting-edge technologies in electrical installations and the industry's general contribution to society (the economy, employment, etc.).

In addition, companies from various sectors (industry, construction, energy, etc.) will highlight the value of the proper use of standards for safety, sustainability, and their broader development.

Moreover, experts will present innovative projects that were implemented using new technological trends in their electrical installations, as well as the challenges they faced, and the results that their businesses achieved.

**26/06/2025**  
MEGARON ATHENS CONCERT HALL

**AGENDA**

**SPEAKERS**

## Key Focus Areas

The main thematic pillars of the Conference follow the latest trends and developments that have emerged in the field of electrical installations, highlighting the most innovative technologies and providing updates on the standards of current legislation:

- Necessity of understanding and applying safety standards and regulations, as well as certification in the field of electrical installations
- Identification of the problems and challenges determining and implementing the safety standards and examples of resolving such difficulties
- Business development and sustainability based on standards
- New cutting-edge technologies
- Best practices for the implementation of safety standards.

## Who will I meet

The conference is addressed, among others, to Senior and Top Executives from all business sectors (industry, construction, energy, telecommunications, technology), as well as to professionals in the public and private sectors who are involved in the field of electrical installations.

### JOB POSITIONS

- CEOS
- GENERAL MANAGERS OF INDUSTRIAL UNITS
- DIRECTORS OF CONSTRUCTION COMPANIES
- TECHNICAL MANAGERS & DIRECTORS
- SAFETY AND HEALTH MANAGERS
- PLANT MANAGERS
- PROCUREMENT MANAGERS
- UNIT MAINTENANCE MANAGERS
- ENGINEERS
- ELECTRICAL ENGINEERS IN INSTALLATIONS
- CONSTRUCTION PROJECT MANAGERS
- FACILITIES MANAGEMENT EXECUTIVES
- INSURANCE AGENTS
- CONSULTANTS
- ENTREPRENEURS
- EXECUTIVES OF COMPANIES PROVIDING SERVICES, TECHNOLOGIES, SAFETY MANAGEMENT SOLUTIONS & PPE
- ACADEMICS/RESEARCHERS
- ENERGY CONSULTANTS

## Why should I participate?

As an attendee you will have the opportunity to:

- **Learn** the latest developments, trends and innovations in the field of electrical installations, including new technologies in the era of digital transformation. Additionally, the content of the conference will highlight the latest safety standards and requirements of the legislation.
- **Become aware** of the methods that you could use to integrate new technologies into your own operations and electrical installations to improve their performance and operational safety, as well as to achieve their modernization.
- **Discuss** the common challenges and problems that arise when implementing safety standards and the ways in which they can be addressed at the lowest possible cost, and utilizing specialized human resources.
- **Exchange** useful opinions with experts in the field of electrical technology and security and get in touch with industry professionals and representatives from international companies and organizations, who will share with the audience innovative global trends and best practices implemented in the European markets.
- **Develop** new partnerships and enhance your professional development and your organization's awareness .
- **View** valuable presentations by international speakers.
- **Interact** with speakers and participants through a special Q&A Live platform.
- **Analyze and exchange opinions** with the experts behind the Study that **The Foundation for Economic & Industrial Research (IOBE)** will present for the first time at the conference. This study, as suggested by the Hellenic Institute of Electrical Technology (HIET), will examine the current institutional framework of electrical installations and equipment in Greece. The Study will also analyze the current standards and institutional status regarding their mandatory and voluntary implementation, as well as the comparison between the standards and manuals among Cenelec, IEC, VDE, BSi and ELOT for electrical installations. In addition, the study will reveal data regarding the number of electrical installations in Greece, compliant and non-compliant, as well as on sample inspections and possible fines imposed by the supervisory authority. Moreover, the study will examine the level of knowledge of the general population regarding the mandatory inspections on electrical installations, and which are the main challenges for the electrical installation market in Greece. Finally, the study will focus on the main trends in the manufacturing industry of electrical equipment as well as in the construction and maintenance of electrical installations in general.

It is a given that your presence will contribute to the creation of a dynamic and constructive dialogue to improve working conditions and strengthen prevention in the professional environment.

# Our purpose is to advance the business landscape

BOUSSIAS's leading network of publishing, conferences and awards activities influences business and leaders to grow in a smarter world.
